

Directions to a Career in Welding Technology

By enrolling at MSCC, you can develop the tools that will put you on the path to a successful welding career. Getting started is simple and easy at MSCC.

Think Like Einstein. Spend Like Scrooge.

Higher education doesn't have to come with a hefty price tag. Affordable, reasonable tuition, coupled with great transfer success and employment outcomes, will help you get a great start on the road to success.

Along the way, you will benefit from great MSCC instructors and an academic support program that is one of the best in the region. Our faculty includes seasoned professionals who bring real-world experience to the classrooms, and our curriculum reflects the latest trends and technologies.

Mid-South
Community College

Want to read blueprints and use welding and cutting equipment to assist in the manufacture various products we use every day?

If you like to make sparks fly and earn a good salary in the process, MSCC's Welding Technology program is a perfect fit for you. Based on skill standards established by the American Welding Society, the program provides theory and practical skills application in welding and cutting. You will have the opportunity to develop skills in arc welding, plasma and air carbon arc cutting, and oxyacetylene, TIG, MIG, and gas metal and flux core arc welding. In the process, you will also learn welding inspection testing principles and fabrication techniques. If you are looking for a 9-5 job pushing paper behind a desk, this program is NOT for you. But if you like the idea of putting things together or cutting them in two, you should give this a try. Small, medium, and large facilities throughout the Mid-South are in need of entry-level welders, and this program will give you the training you need to find a quality job.

Potential Careers & Earnings

Welding Machine Operator | \$40,000

Welder/Cutter | \$65,000

Combination Welder | \$65,000

These salaries are based on information from the Arkansas Department of Workforce Education and salary.com. They reflect earnings for employees with several years of experience.
